SUMMARY

Computer Science undergraduate with experience building production-oriented web applications through academic and freelance projects. Experienced in backend and full-stack development using Django, Spring Boot, and PostgreSQL, with hands-on experience in automated testing, API design, performance testing, and CI/CD workflows. Seeking opportunities to contribute to impactful software products while continuing to grow as a software engineer.

EDUCATION

Bachelor of Computer Science

Universitas Indonesia

2023 - Present

GPA: 3.52/4.00

PROJECTS

Garuda Cendekia Academy Web - Freelance Project

Backend Developer - <https://dev.garudacendekiaacademy.com>

- Designed and built an end-to-end school academic information system using Spring Boot and PostgreSQL.
- Implemented secure authentication and authorization using Spring Security and JWT, and integrated email automation services via Resend API.
- Designed and developed role-based, paginated REST APIs for training session management across athletes, coaches, and director user groups.
- Worked directly with stakeholders to translate business requirements into technical solutions.

Gallery Exhibition Fasilkom UI - Academic Project, Software Engineering Project

Full stack Developer - <https://gallery.ppl.cs.ui.ac.id/>

- Developed & documented RESTful APIs for a full-stack Comments microservice using Django REST Framework and React/TypeScript, implementing typed API clients and modular UI architecture.
- Applied Test-Driven Development (TDD) with comprehensive backend (pytest) and frontend (Jest) test suits achieving comprehensive backend and frontend test coverage and caching edge cases.
- Conducted load, stress, and spike testing using k6, leveraging Grafana and Prometheus metrics to identify and optimize performance bottlenecks and improve system reliability.
- Maintained GitLab CI/CD pipelines and improved code quality through SonarQube static analysis and security checks.

EXPERIENCE

Fasilkom UI | Teaching Assistant of Security-Driven Software Development

2026

- Assisted instructors in course delivery and assignment evaluation for an introductory secure software development course.
- Reviewed student submissions and provided feedback on software security concepts and development practices.
- Collaborated with faculty members to support learning activities and assessments.

Dasar-Dasar Pemrograman 0 | Python Mentor

2024

- Mentored first-year students on Python fundamentals, basic data structures, and computational thinking concepts.
- Assisted students in preparing for introductory programming coursework.

SKILLS

Programming Languages: Java, Python, TypeScript, JavaScript, Golang (Basic), Rust (Basic)

Frameworks: Spring Boot, Django, Next.js, Flutter, Tailwind CSS

Databases: PostgreSQL, Supabase

DevOps Tool: Git, Docker, GitLab CI/CD, Postman, Prometheus, Grafana, SonarQube

Software Engineering: REST API, TDD, Automated Testing, SOLID Principles, Refactoring, Agile/Scrum, Debugging

Languages: Indonesian (Native), English (Professional Working Proficiency)
